

DIAGNOSTIC PROCEDURE THAT ARE NOT COVERED TO WARD PLAN

1	Pre and Post Natal consultations
2	Eye, ear, nose and throat ENDOSCOPY (EENT) treatment
3	Eye laser therapy for retinal tear, retinal hole, retinal detachment and glaucoma
4	Electrocauterization of skin lesions such as plantar warts, flat warts, periungual warts, filiform warts and molluscum contagiosum, in any part of the body, genital warts and condyloma acuminata, prescribed
5	Sclerotherapy for varicose veins
6	Allergy Testing/ allergy screening and the other related
7	Speech Therapy
8	Tuberculin test
9	24-hour Electroencephalogram (EEG) Monitoring
10	24-hour Holter Monitoring
11	Adrenocortical Function
12	Anti-Nuclear Antibody, C-Reactive Protein, Lupus Cell Exam
13	Arterial Blood Gas
14	Arthroscopic Procedures, Orthopedic Arthroscopy
15	Bone Densitometry Scan (Dexascan)
16	Bone Mineral Density Studies
17	Cardiac Stress Tests (Thallium and Dipyridamote Stress Tests)
18	Computed Tomography (CT) Scans
19	Diagnostic Radiographs:
	a. Biliary tract: Cholecystogram and Cholangiogram
	b. Digestive: Plain film of the abdomen, Barium Enema, Upper Gastrointestinal (GI) Series, Lower GI Series, Small Bowel Series
	c. Urinary: Kidney, Ureter and Bladder (KUB) Pyelograms and Cystograms
	Diagnostic Ultrasound:
	a. 2D-echo
	b. Abdomen
	c. Duplex Scan
	d. Digestive and Urinary Systems
	e. Ultrasound of the Lungs
14	Electroencephalogram (EEG) Monitoring
15	Electromyography and Nerve Conduction Studies
16	Impedance Plethysmography
17	Magnetic Resonance Angiography (MRA)
18	Magnetic Resonance Imaging (MRI)
19	Mammogram and Sonomammogram
20	Myelogram
21	Nuclear Radioactive Isotope Scan
22	Perfusion Scan
23	Plasma Urinary Cortisol, Plasma Aldosterone
24	Polysomnograms (Sleep Recording)
25	Pulmonary Function Tests
26	Radioisotope Scans and Function Studies:
	a. Cardiac
	b. Gastrointestinal
	c. Liver
	d. Parathyroid Bone, Pulmonary (Perfusion/Ventilation Lung Scans)
	e. Renal
	f. Thyroid Scans
	g. Total Body Scans
27	Radionuclide Ventriculography
28	Surface Electromyography (SEMG)
29	Thallium Scintigraphy
30	Treadmill Stress Test (TMST)
31	Arthrocentesis

32	Dialysis
33	Intravenous Chemotherapy
34	Phlebotomy
35	Physical therapy / Occupational therapy excluding subspecialties such as cardiac rehabilitaton, pulmonary rehabilitation and the like
36	Thoracentesis
37	Therapeutic Radiology:
	a. Brachytherapy
	b. Cobalt
	c. Linear Accelerator Therapy
	d. Radioactive Cesium
	e. Radioactive Iodine
38	Continuous Positive Airway Pressure (CPAP) titration for sleep study
39	Oral Chemotherapy
40	Angiography (gastrointestinal, brain, retinal and peripheral vascular)
41	Coronary Angiogram and/or Angioplasty/Coronary Artery Bypass Graft
42	Cryosurgery
43	Gamma Knife Surgery
44	Hysteroscopic Myoma Resection
45	Hysteroscopically guided D&C
46	Laparoscopy
47	Lithotripsy
48	Percutaneous Ultrasonic Nephrolithotomy
49	Stereotactic Brain Biopsy
50	Mammotone
51	4D ultrasound
52	Esophageal Manometry
53	Intensified Modulated Radioteraphy
54	Botox which is not cosmetic in nature nor for beutification purpose
56	Positron Emission Tomography (PET) Scan
57	CT Pulmonary Angiography
58	Photodynamic Therapy
59	Other medically necessary modalities not mentioned above and those for which there are no comparable, conventional or traditional counterparts
60	Transurethral Microwave Therapy of Prostrate
61	room upgrade in case of room unavailability
62	Hospitalization outside the Philippines
63	Work related conditions based on conditions covered by ECC
64	scoliosis including necessary procedures physical therapy sessions, whether,

1. ANA Profile e.g. Anti-Nuclear-Antibody, Anti-Native DNA, Anti-SM, Anti-SSA, Beta HCG, AMA
2. Thyroid Profile e.g. T3T4, T3 Uptake, FT4, FTA-ABS
3. THOCH Profile e.g. Anti-Toxoplasma Gondil (IgM), Anti-Rubella, Anti-Cytomehalo-Birus (Total Ig)
4. SLE Test, FAT, Widal Test, ASO Titer, Serum Ig-G, Alpha Feto, Protein, ESR
5. Urine/Blood Culture and Sensitivity Test
6. 24-Hour protein determination
7. Troponin
8. Glycosylated Hemoglobin
9. Prostate Specific Antigen (PSA)
10. Mammography
11. All types of CAT Scan
12. Nuclear Imaging including Parathyroid Scan
13. Total Body Scan
14. Bone Scan
15. Renal Scan
16. Pulmonary Scan
17. Thallium Scan

18. Thyroid Scan up to
19. All types of Echocardiography
20. Fluorescent Angiography or Angioscopy of Eye
21. Breast Scintigraphy
22. 3-D Imaging
23. Chest, Abdominal, Thyroid, Pelvic and Transvaginal Ultrasonograph
24. Electromyography with Nerve Conduction Tests
25. Electro-Encephalography (EEG)
26. All types of Stress Testing
27. Warts, Except Genital and Sexually transmitted Warts
28. SCLEROTHERAPY
29. LAPAROSCOPIC CHOLECYSTECTOMY and FIBRO ENDOSCOPIC SINUS SURGERY
30. LITHOTRIPSY and ARTHROSCOPIC KNEE SURGERY
31. MAGNETIC RESONANCE IMAGING (MRI)
